Some of my Research Projects

Expert Evaluator for research projects for the BMBF (Federal Ministry of Education and Research, Berlin)

I take a leading function in numerous projects including the following: -

- (1) MoCaB – Mobile Care Backup** is the support of caregivers by a mobile software program
 - Providing expertise in specific nursing situations through web-based, multimedia knowledge resources
 - Digital nursing-diary for the documentation of own nursing activities
Use of MTI technologies
 - Exchange platform with relatives/friends providing nursing care
 - Support by professional nursing personnel and technology

Volume: Euro 2.2 Million, Run-time: 3 Years

<https://www.technik-zum-menschen-bringen.de/projekte/mocab>

- (2) PPZ Hannover - PflegePraxisZentrum (Nursing Practice Centre) Hannover**

The aim of the Nursing Practice Centre Hannover project is to set up a future-oriented ward in which technical innovations are used to support nurses and improve patient care. Implementation takes place alongside the normal patient treatment and operational processes on a trauma surgical ward in a university hospital

Volume: Euro 3.99 Million, Run-time 5 Years <https://www.ppz-hannover.de/>
